Chatmaite difference

Messaging apps can't include friends and chatbots at the same time....

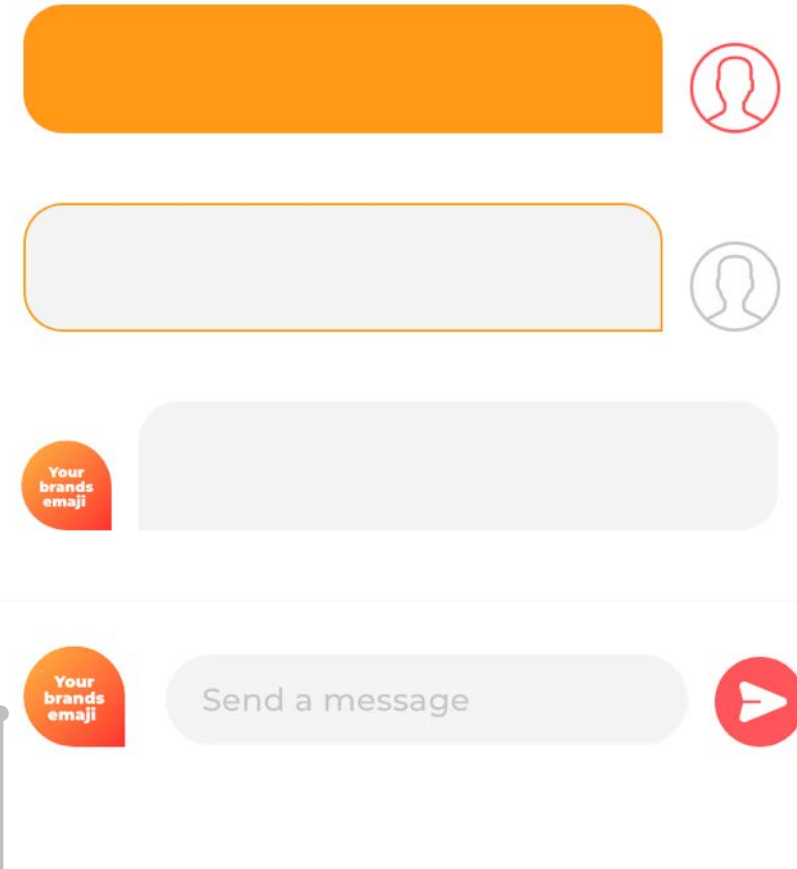

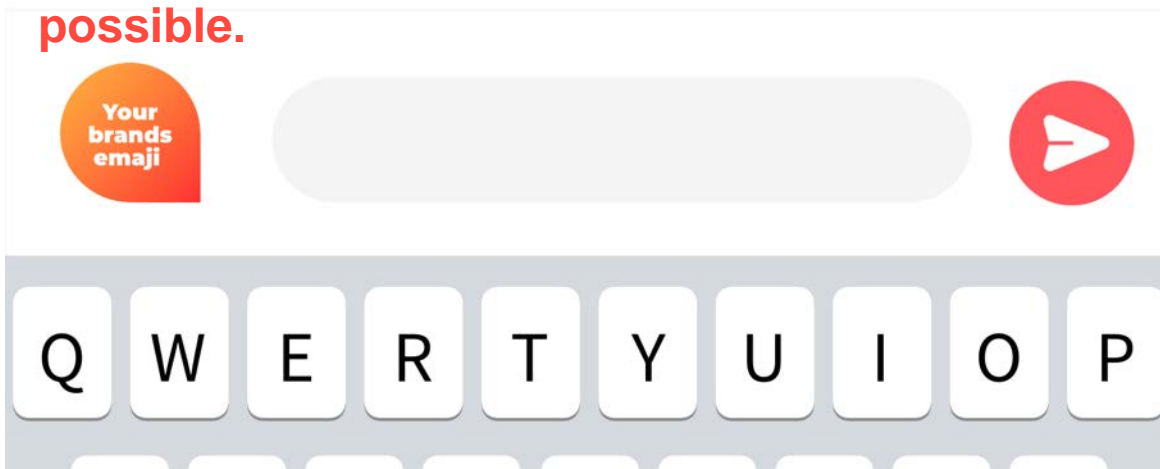

"Who's talking to who?"

....You message friends, or they message you and all the chatbots will answer, spamming the group.

Who wants to talk to a robot by themselves?

How we make it possible!

Chatmaites unique user interface distinguishes who is talking to who, making group messaging with artificial intelligence possible.

Talk directly to brands by clicking left.

Send friend messages by clicking right

Introducing the 'emaji'

Chatmaite allows **multiple branded** conversation partners called **emajis**, directly into **chat groups**.

Emajis (emojis with artificial intelligence) allow **groups of friends** to directly talk with brands.

Group members control the feed and timing, avoiding the common complaint of chatbot spamming which force users to silence them.

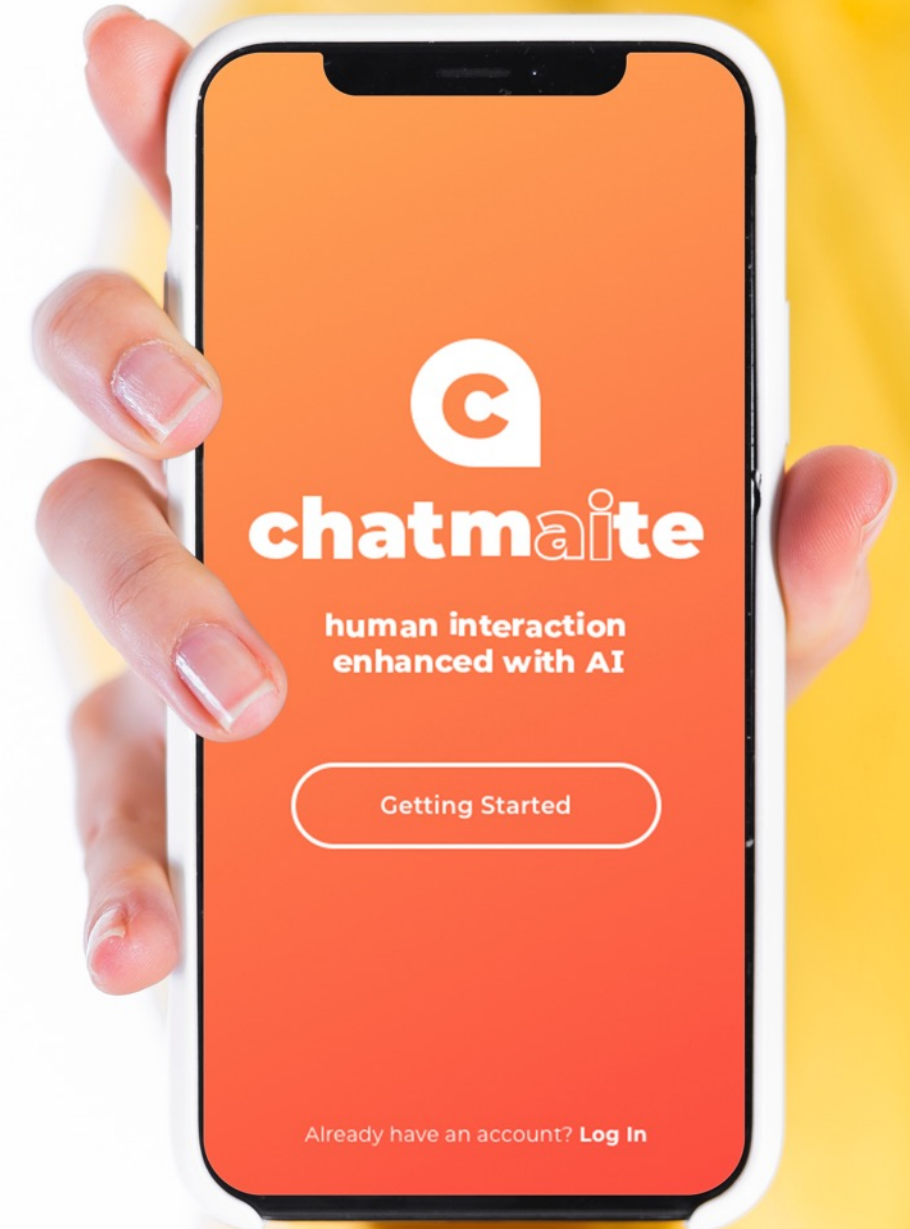

Illustration purposes only.

Become a Brand Partner

Currently have a Chatbot?

Sign up now and we will create an exclusive emaji for your brand to engage with consumers via the platform.

Chatmaite offers:

- Revenue potential via direct ads and marketing promotions
